

InsurLab Germany e.V.

Topic Groups

English Version 05/2021

Topic Groups: Overview clusters, status & result formats

Broad range of topics and professional depth

Goal: professional exchange with knowledge gain for innovation & digitalization

April 2021

Cluster	ID	Current overview of our Topic Groups	result formats
Claims management	#2	Automation of claims processing from non-digital input channels	knowledge exchange
Claims management	#12	IoT applications in the field of water damage (sensor technology, prevention)	cost reduction
Claims management	#17	Fraud prevention	cost reduction
Data Analytics & AI	#4	Data analytics in life insurance	knowledge exchange
Data Analytics & AI	#9	Implement successfully AI in insurance companies	Whitepaper
Cloud & IT	#15	Cloud push – introduction and operation of cloud technologies	knowledge exchange
Open Insurance	#16	Open insurance – Open interfaces for beyond insurance use cases	Whitepaper
Ecosystem	#6	Digital commercial insurance 2025 in the ecosystem	value-added services
Cyber	#18	Cyber security	Whitepaper
Innovationsmanagement	#5	Design thinking	knowledge exchange
Innovationsmanagement	#7	Digital transformation – New Work	Whitepaper
Innovationsmanagement	#8	Innovationsmanagement: Methods, experiences, positioning	knowledge exchange
Health	#13	Policyholder control in health insurance	TBD
Sustainability	#14	Insurance Development Aid by GIZ	knowledge exchange
Sustainability	#19	CO2 neutrality from the insurers' perspective	knowledge exchange
Ecosystem	#20	Well-being („health & prevention“)	TBD
Ecosystem	#21	Digital ecosystem	TBD

All groups are open to additional interested participants

Registration for Topic Groups and information about it please contact stefan.schmid@insurlab-germany.com

#2 Automation of claims processing from non-digital input channels

Site Assessments: What is promised, what really works? Present software architecture approaches. Methods for structuring, formatting, enriching, and validating malware data. Automated transformation of unstructured malware data.

#12 IoT applications in the field of tap water (sensor technology, prevention)

Create transparency on approaches to tap water loss reduction through the use of IoT.

#17 Fraud prevention

Identification of starting points and technical solutions for fraud prevention in service provision

#4 Data analytics in life insurance

Identification and evaluation of use cases and exchange of experience

#9 Implement successfully AI in insurance companies

For each topic area we want to create publications and then make them available collectively in one main document

#15 Cloud push – introduction and operation of cloud technologies

Help insurers prepare for and work efficiently and securely with cloud technologies.

Claims management

Data Analytics
& AI

Cloud
& IT

#16 Open Insurance – Open interfaces for beyond insurance use cases

Develop use cases, identify opportunities and risks for the different stakeholders and define added value for the customer

Open
Insurance

#6 Digital commercial insurance 2025 in the ecosystem

Development of a list of service providers & services, which represent an added value for tradesmen

Eco-
system

#18 Cyber security

Analysis of the digitalization status and potential for cyber insurance in the DACH (Germany, Austria, Switzerland) market

Cyber

#5 Design Thinking

Exchange on the different application scenarios of Design Thinking in companies, from "method case" to innovation management approach; help with challenges, best practice, best failures.

Innovationsmanagement

#7 Digital transformation – New Work

Gaining knowledge and sharing good practices in the context of current "New Work" developments in the digital transformation. Establishment of an exchange platform for experts and interested parties to complement and deepen the InsurLab Journey

#8 Innovationsmanagement: Methods, experiences, positioning

Active exchange, best practices (Which topics/measures have been successfully implemented so far and how?) and lessons learned (What didn't work out, what can be learned from?)

#13 Policyholder control in health insurance

Identify potentials and best practices for early detection of health risks and issues

Health

#14 Insurance Development Aid by GIZ

The Topic Group, with the support of the German Federal Ministry for Economic Cooperation and Development, is organizing an event to develop approaches to challenges in development cooperation (DC).

Sustainability

#19 CO2 neutrality from the insurers' perspective

knowledge exchange

#20 Well-being („health & prevention“)

...

Ecosystem

#21 Digital ecosystem

...

Dear members,

We have recently set up a SharePoint for you, which should simplify the exchange and communication within the Topic Groups.
